Art Unit: 3662

1. Claim 2 is objected to because of the following informalities: in line 6, the term "least" would appear to be more appropriate than the term "lease". Appropriate correction is required.
2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 6 recites the limitation "the domain conversion" in line 2, there is insufficient antecedent basis for this limitation in the claim. The term "the" does not appear to be necessary.
3. Claims 1 and 8 are allowed. The closest art (US 6687187) to applicant does not claim the detecting directional orientation of distinct acoustical **sources** or introducing an increased attenuation for acoustical signals received from a source which fulfils a predetermined **criterion** with respect to directional orientation in said histogram.
